

15+ AI Prompts to Supercharge User Story Writing

Powered by PM Pathfinder | www.thepmpathfinder.com

1. Epic Breakdown

- Split a story on 'travel booking personalization' into 5 INVEST-format user stories.
- Break down a feature on dashboard filters into individual user stories with testable outcomes.

2. Persona-Specific Story Writing

- Write a user story for a Gen Z user who wants to customize trip alerts in a travel app.
- Create stories for a small business owner managing invoices on a mobile app.

3. Acceptance Criteria Generation (Gherkin-style)

- Add Gherkin-style acceptance criteria to a user story on enabling two-factor authentication.
- Generate acceptance criteria for low battery, no network, and cancel scenarios.

4. Edge Case Exploration

- Suggest edge case test scenarios for a subscription feature with auto-renewal.
- Include negative flows and validation errors for user registration stories.

5. JTBD + User Story Bundles

- Create a user story + job-to-be-done + 3 acceptance criteria for a food delivery app.
- Bundle a JTBD framework with stories for onboarding first-time users.

6. Rewriting and Clarity Refinement

- Make this story clearer, more concise, and testable: 'As a user, I want better settings.'
- Rewrite a vague user story using INVEST principles.

7. QA Collaboration Prompts

- Generate questions a QA might ask for the story: 'As a user, I want to change my password.'
- Draft test cases based on acceptance criteria for order cancellation flow.

8. Sprint Planning Accelerators

- Summarize a long epic into 3 user stories, each with Gherkin criteria.
- List top unknowns or clarifications needed for a new payments module feature.
